

ORDER IN 5 EASY STEPS

1. Select Mount Type:

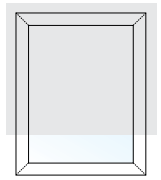

INSIDE

- Mounted within the window frame
- Provides a clean, built-in look
- Great way to leave attractive woodwork exposed
- See page 74 for minimum depth requirements
- If window frame isn't deep enough please select outside mount

OUTSIDE

- Great option when there is not enough depth for an inside mount
- Mounted to the wall, ceiling or molding surface surrounding the window
- Often used to make the window appear larger or to hide a less attractive window or door
- No minimum depth requirement
- Minimum of 1 1/4" of flat surface (on wall, ceiling or frame) required for secure mount

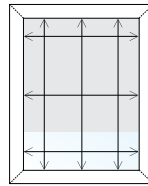

2. Measure:

INSIDE

STEP 1: Measure the inside width at 3 locations - the top, middle and bottom. Record the smallest of the 3 measurements. This is your ordering width. We will make the necessary deductions (approx. 1/4" - 3/8")

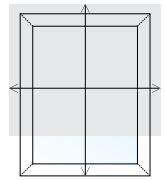

STEP 2: Measure the height at 3 locations - the left side, middle and right side. Record the largest of the 3 measurements. This is your ordering length.

OUTSIDE

STEP 1: Measure the width of the area you wish to cover. If space allows we recommend adding 2-3" (1-1 1/2" each side) to this measurement to help eliminate light seepage. This is your ordering width and will be the overall measurement of the shade.

STEP 2: Measure the height of the area you wish to cover. This is your ordering length.

3. Select Control Type:

STANDARD CORD LOCK

- Allows you to raise and lower shade, and lock in place
- As shade is raised, cord length increases
- Cleet included to wrap cord around for clean look and child safety
- NO CHARGE

CONTINUOUS LOOP CONTROL

- Continuous cord allows for easy operation
- The cord always remains the same length no matter what position the shade is in
- Comes with white headrail which has color coordinated 1" aluminum slat inserted into fascia
- Required on pleated shades and 3/4" cellular shades over 96" wide
- Minimum width = 18"
- See page 74 for depth requirements
- \$40 SURCHARGE (PLEATED / 3/8" CELLULAR)
- \$80 SURCHARGE (3/4" CELLULAR)

4. Select Control Position: LEFT OR RIGHT

- This is the side of the shade which your control will hang from (left or right)
- Consider any obstacles that may interfere with operation (door handle, window opener, furniture location, etc.)

5. Select Lining Option: (Pleated Shade only)

UNLINED

- No lining added to your window treatment
- Preserves the natural sheerness of the material
- NO CHARGE

PRIVACY LINING

- Offers privacy and provides light control
- 30% SURCHARGE

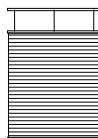

BLACKOUT LINING

- Blocks 95% of light for complete privacy and great insulation
- Great for media rooms and bedrooms
- 40% SURCHARGE

+ Optional Features:

TOP DOWN / BOTTOM UP

- Dual operation allows you to control privacy while still allowing light in
- Shade can be lowered from the top down and raised from the bottom up
- Maximum width = 72" Maximum length = 96"
- Not available with continuous loop control
- \$45 SURCHARGE (CELLULAR)
- \$50 SURCHARGE (PLEATED)

2 SHADES ON 1 HEADRAIL

- 2 shades hang from the same headrail and operate independently
- Total width you provide will be divided equally making both shades equal size (contact us for specialty requests)
- Small gap (approximately 1/2") will exist between the 2 shades
- Required on 3/8" cellular shades greater than 96" wide
- Not available with continuous loop control
- \$40 SURCHARGE (CELLULAR)
- \$35 SURCHARGE (PLEATED)
