

ORDER IN 6 EASY STEPS

1. Select Mount Type:

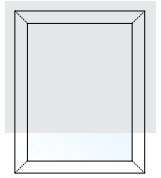

INSIDE

- Mounted within the window frame
- Provides a clean, built-in look
- Great way to leave attractive woodwork exposed
- See pg. 68 minimum depth required for secure mount
- If window frame isn't deep enough please select outside mount

OUTSIDE

- Great option when there is not enough depth for an inside mount
- Mounted to the wall, ceiling or molding surface surrounding the window
- Often used to make the window appear larger or to hide a less attractive window or door
- No minimum depth requirement
- Minimum of 2 1/4" flat surface (on wall, ceiling or frame) required for secure mount

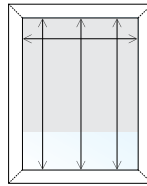

For flush mount requirements see pg. 68

2. Measure:

INSIDE

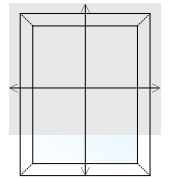

- STEP 1:** Measure the inside width at the top of the window. This is your ordering width. We will make the necessary deductions. (approx. 1/8")
- STEP 2:** Measure the height at 3 locations - the left side, middle and right side. Record the largest of the 3 measurements. This is your ordering length.

Note: Roller / Solar shade fabrics will be approximately 1 3/8" narrower than your ordering width to allow for brackets. If concerned over resulting light gap please select outside mount.

OUTSIDE

- STEP 1:** Measure the width of the area you wish to cover. If space allows we recommend adding 3-4" (1 1/2-2" each side) to this measurement to help eliminate light seepage. This is your ordering width and will be the overall measurement outside bracket to outside bracket.
- STEP 2:** Measure the height of the area you wish to cover. This is your ordering length.

Note: Your shade material will be made 1 1/4" narrower than the measurement you provide to allow for brackets. If you need your shade to cover a specific width (e.g. for mounting a shade on a door) add 1 1/4" to the desired shade material width and this will be your ordering width.

3. Select Control Position: LEFT OR RIGHT

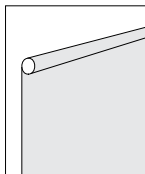

- This is the side of the shade which your control will hang from (left or right)
- Consider any obstacles that may interfere with operation (door handle, window opener, furniture location, etc.)

4. Select Bracket Color: WHITE / GREY / BLACK / ANODIZED SILVER (ROLLERS BY CHILEWICH ONLY)

5. Select Roll Type:

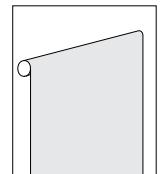

REGULAR ROLL

- Fabric falls off the back of the roll
- Allows shade to remain close to casing on outside mount
- NO CHARGE

REVERSE ROLL

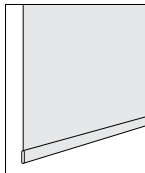

- Fabric falls off the front of the roll
- Provides finished look when not adding a valance
- Allows for additional clearance
- Not available if ordering shade with valance
- NO CHARGE

6. Select Bottom Bar Style:

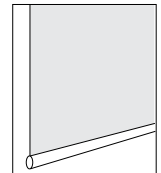

SEWN-IN

- Thin metal bar is placed into a pocket at the bottom of the shade
- Bar is not visible
- Provides stability
- NO CHARGE

EXPOSED

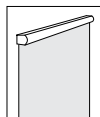

- Decorative metal bar provides sleek look
- Available in white, silver or espresso
- \$25 SURCHARGE

+ Optional Feature:

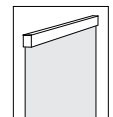

METAL OR FABRIC COVERED VALANCE

- Not available with reverse roll
- Decorative valance that helps to hide control mechanism
- Available in white, silver, espresso or fabric insert
- 1 1/4" minimum depth required for secure mount
- Maximum shade length = 80" (for longer shade requests contact customer service)
- \$15/FT. IN WIDTH SURCHARGE (3 FT MIN)

UPHOLSTERED VALANCE

- Not available with reverse roll
- Fully upholstered valance helps hide control mechanism
- Made from the same material as shade
- For minimum depth requirements see pg.68
- \$30/FT. IN WIDTH SURCHARGE (3 FT MIN)
