

ROLLER+SOLAR SHADES MEASURE INSTRUCTIONS

ORDER IN 6 EASY STEPS

1. Select Mount Type:

Inside:

- Mounted within the window frame
- Provides a clean, built-in look
- Great way to leave attractive woodwork exposed
- If window frame isn't deep enough, please select outside mount

Outside:

- Great option when there is not enough depth for an inside mount
- Mounted to the wall, ceiling or molding surface surrounding the window
- Often used to make the window appear larger or to hide a less attractive window or door
- No minimum depth requirement

2. Measure:

Inside:

Step 1: Measure the inside width at the top of the window. This is your ordering width. We will make the necessary deductions. (approx. 1/8")

Step 2: Measure the height at 3 locations – the left side, middle and right side. Record the largest of the 3 measurements. This is your ordering length.

Note: Roller / Solar shade fabrics will be approximately 1 3/8" narrower than your ordering width to allow for brackets. If concerned over resulting light gap please select outside mount.

Outside:

Step 1: Measure the width of the area you wish to cover. If space allows we recommend adding 3–4" (1 1/2"-2" each side) to this measurement to help eliminate light seepage. This is your ordering width and will be the overall measurement outside bracket to outside bracket

Step 2: Measure the height of the area you wish to cover. This is your ordering length.

Note: Your shade fabric will be 1 1/4" narrower than the measurement you provide to allow for brackets. If you need the fabric to cover a specific width (i.e. for mounting the shade on a door), add 1 1/4" to the desired fabric width and this will be your ordering width.

* For shades with upholstered valance, please know the valance will be 1" wider overall due to returns.

3. Select Control Position: Left or Right

- This is the side of the shade that your control will hang from (left or right)
- Consider any obstacles that may interfere with operation (door handle, window opener, furniture location, etc.)

4. Select Bracket Color:

Our exclusive premium designer brackets are the crowning detail for your shade. These metal brackets are available in 5 designer finishes: White, Chrome, Satin Nickel, Bronze, and Black.

5. Select Roll Type:

Regular Roll:

- Fabric falls off the back of the roll
- Allows shade to remain close to casing on outside mount (or glass on inside mount)
- No Charge

Reverse Roll:

- Fabric falls off the front of the roll
- Provides finished look when not adding a valance
- Allows for additional clearance
- No Charge
- Not available when ordering with metal valance

6. Select Bottom Bar Style:

Sewn-In:

- Thin metal bar is placed into a 2" pocket at the bottom of the shade
- Bar is not visible
- Provides stability
- No Charge

Exposed:

- Decorative metal bar provides sleek look
- Available in white, silver or espresso
- Surcharge applies

ROLLER+SOLAR SHADES MEASURE INSTRUCTIONS (continued)

ORDER IN 6 EASY STEPS

Mounting Requirements:

Product	Minimum Depth to Install	Minimum Depth for Flush Mount	Minimum Space for Outside Mount
Roller + Solar shades	¾"	2¼"	2¼"
with metal or fabric insert valance	1¼"	2¾"	2¼"
with upholstered valance	1¼"	3"	2¼"
with larger metal or fabric insert valance **	1½"	4¼"	2¼"
with larger upholstered valance **	1¾"	3⅞"	2¼"

** Larger valances are used for thicker materials and/or extra long shades. All outside mount roller shades with upholstered valances will come in the larger size.

Please note: Some roller materials may have maximum widths, in areas with wide widths, it may be necessary to split the area into multiple shades side by side. In this case, multiple shades under one valance may be possible. Contact customer service for special requests

+ Optional Feature:

Metal or Fabric Insert Valance:

- Not available with reverse roll
- Decorative valance that helps to hide control mechanism
- Available in white, silver, espresso or fabric insert
- Surcharge applies
- Standard metal valance is 2½" tall x 2¾" deep. Larger 4" tall x 4¼" deep valances are used for thicker materials and/or extra long shades.

Upholstered Valance:

- 4" tall upholstered valance helps hide control mechanism
- Made from the same material as shade
- Surcharge applies
- When ordered as an outside mount, valance will be 1" wider than ordering width (due to returns) and will be 3⅞" deep overall.
